

# CREATING CURRENT ACCOUNT ACTION

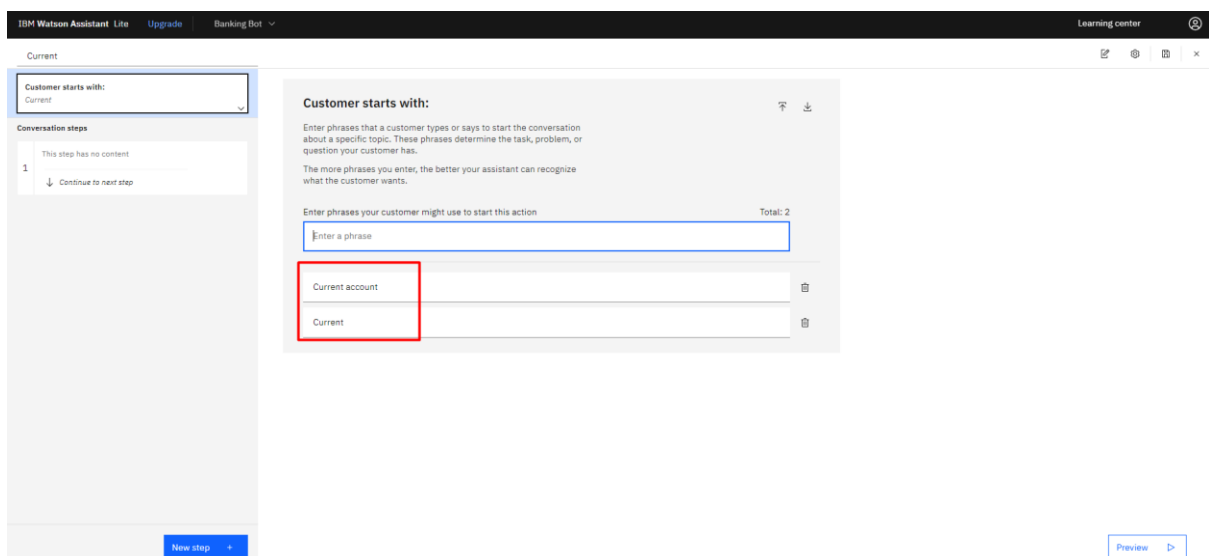

TEAM ID	PNT2022TMID08538
PROJECT NAME	AI BASED DISCOURSE FOR BANKING INDUSTRY

## CREATE CURRENT ACCOUNT

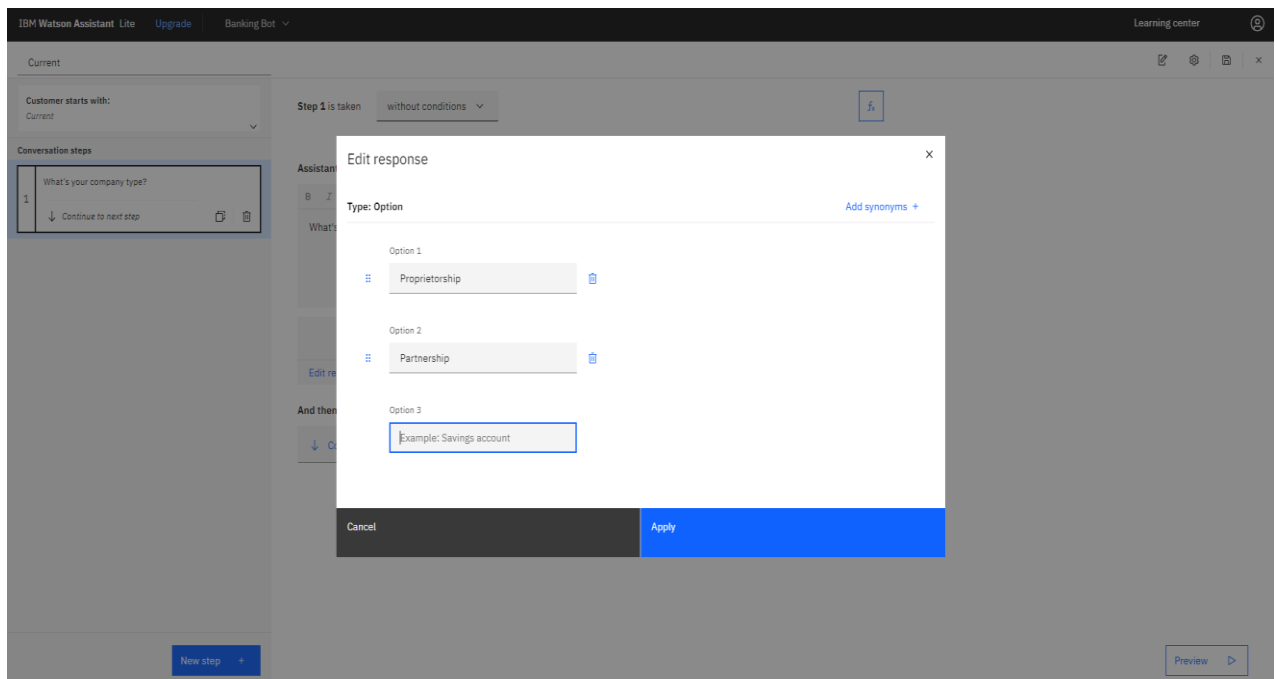

Now we create the action for current account queries.

If a customer types current or current account he will be redirected to this current action

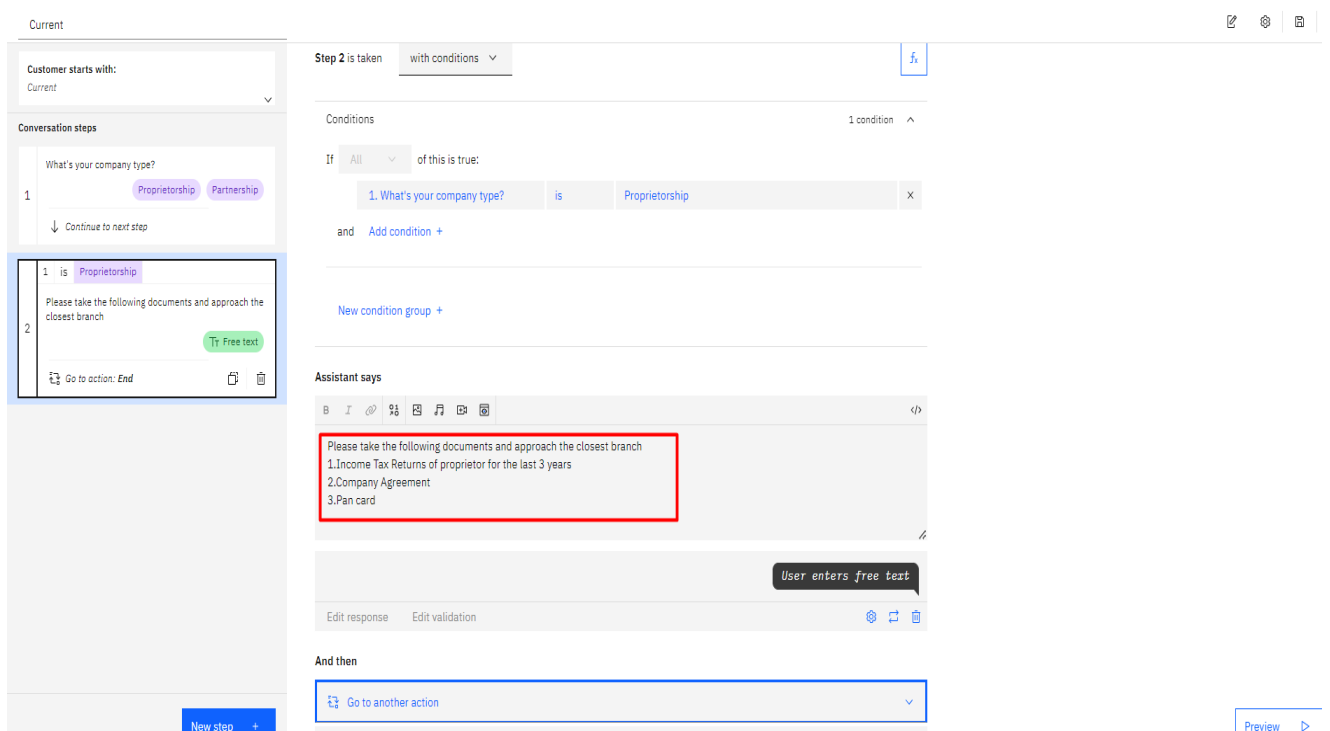

In customer response we add the company types as options

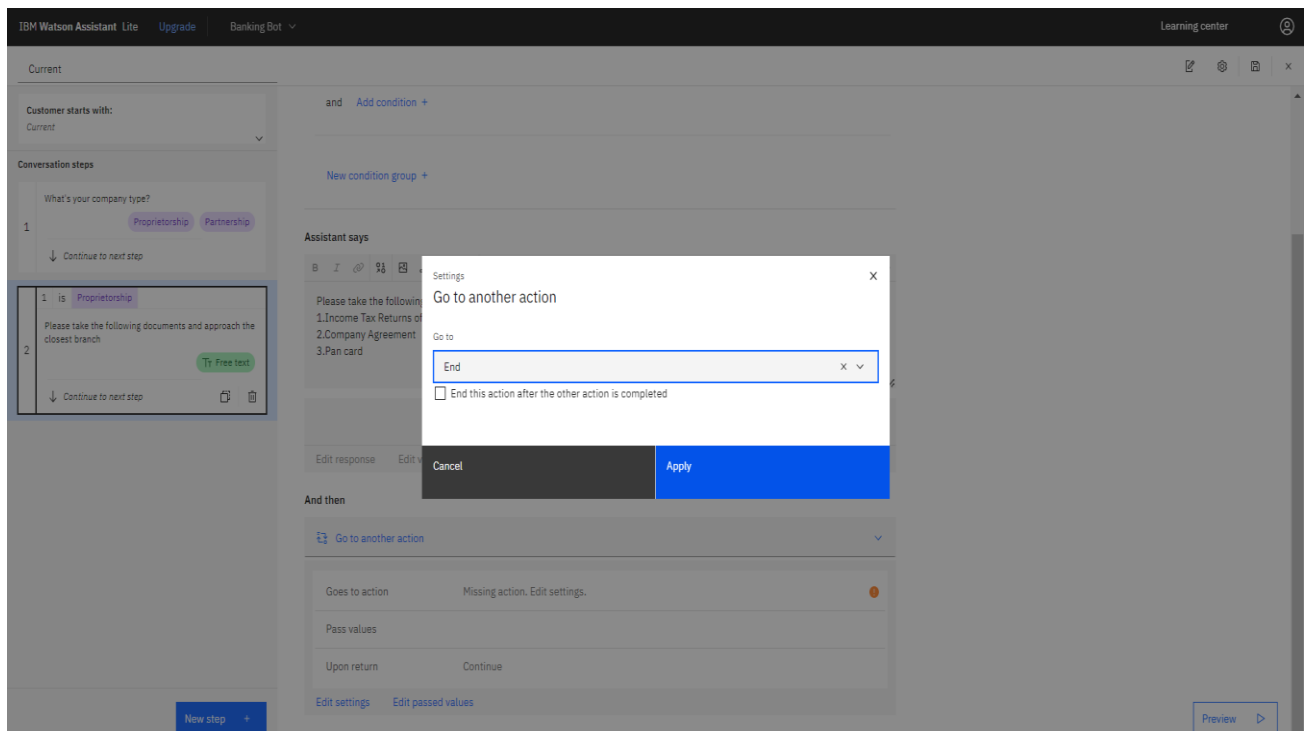

The user has two options to select the following images show the action done if user clicks on Proprietorship company.

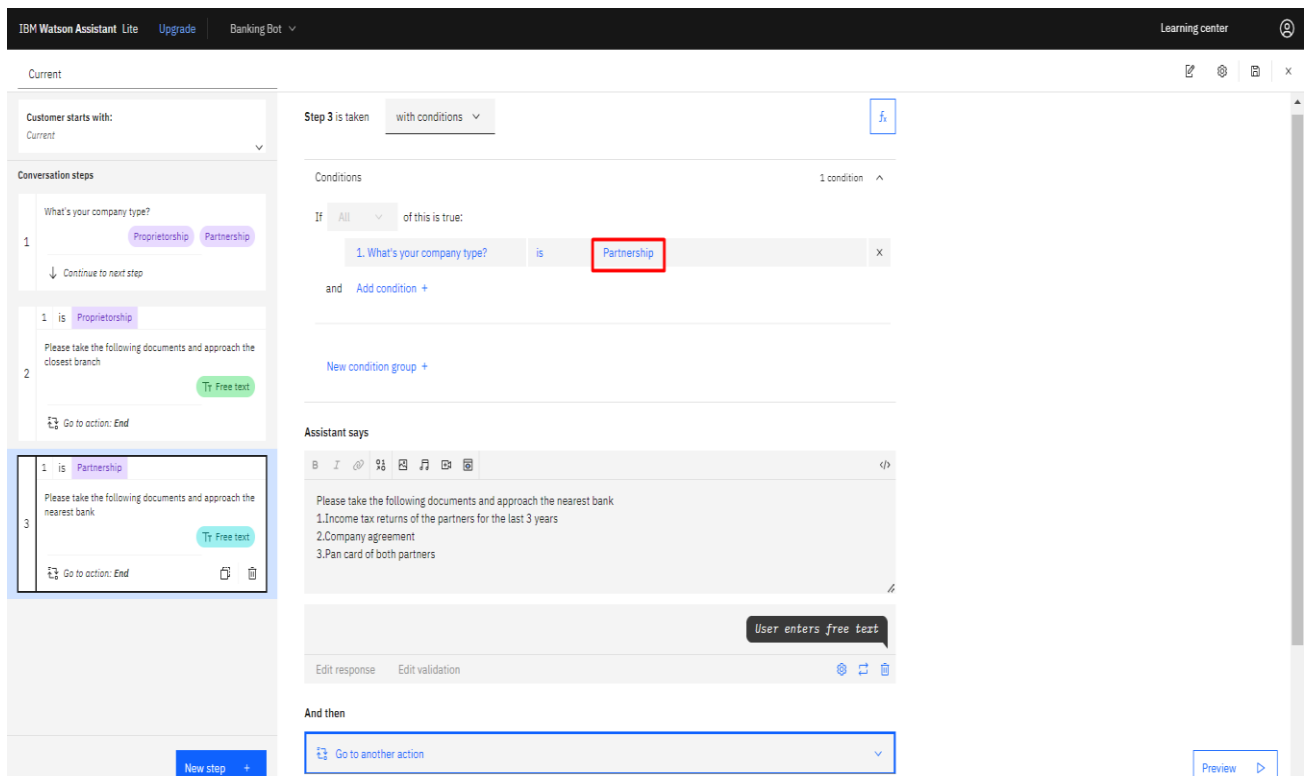

The chat bots' response as follows..

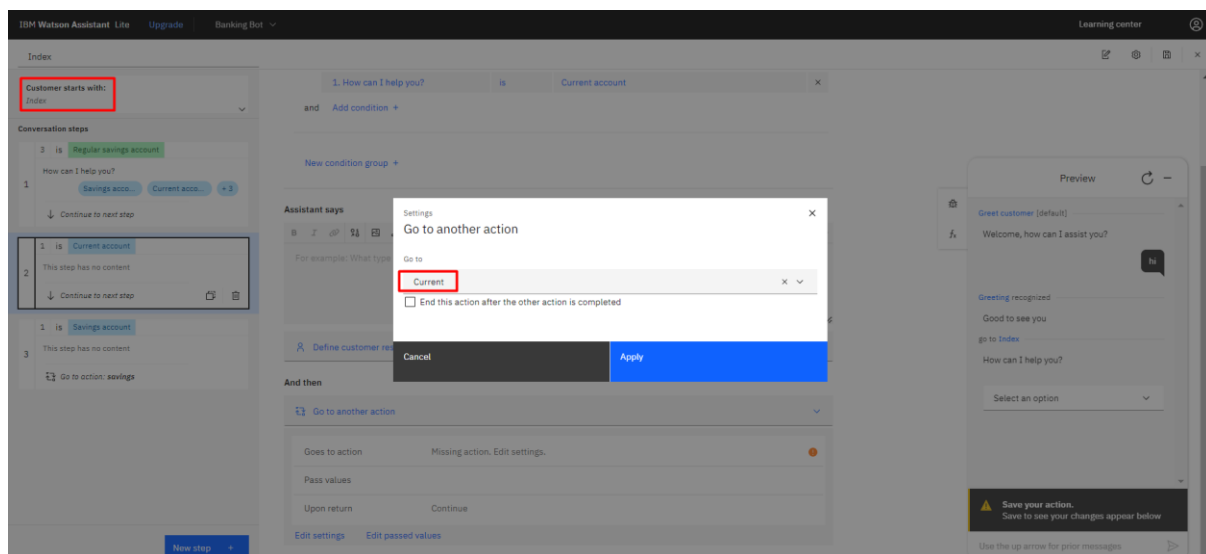

And according to users response we will redirect him to END action

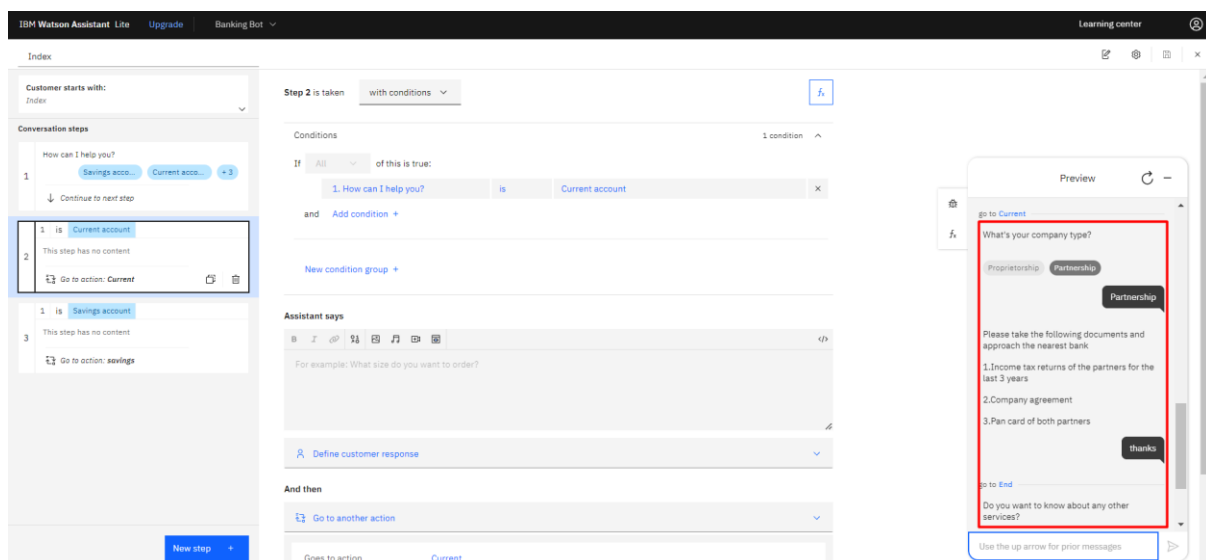

Now if the user clicks as partnership company we set the actions as follows similar to above action

Until now we have created the current account action..but we need to link this to index action.

Now the preview shows

As our entire project is about creating a chat bot using Watson assistant, we have comparatively less coding part. Hardly we are having about 2 to 3 coding areas which are not necessarily needed in this task.

So, we just attached screenshots of the entire process of developing the chatbot
