

Project Development Phase

SPRINT 2

Date	04 November 2022
Team ID	PNT2022TMID08538
Project Name	AI based discourse for Banking Industry

1.Savings account action

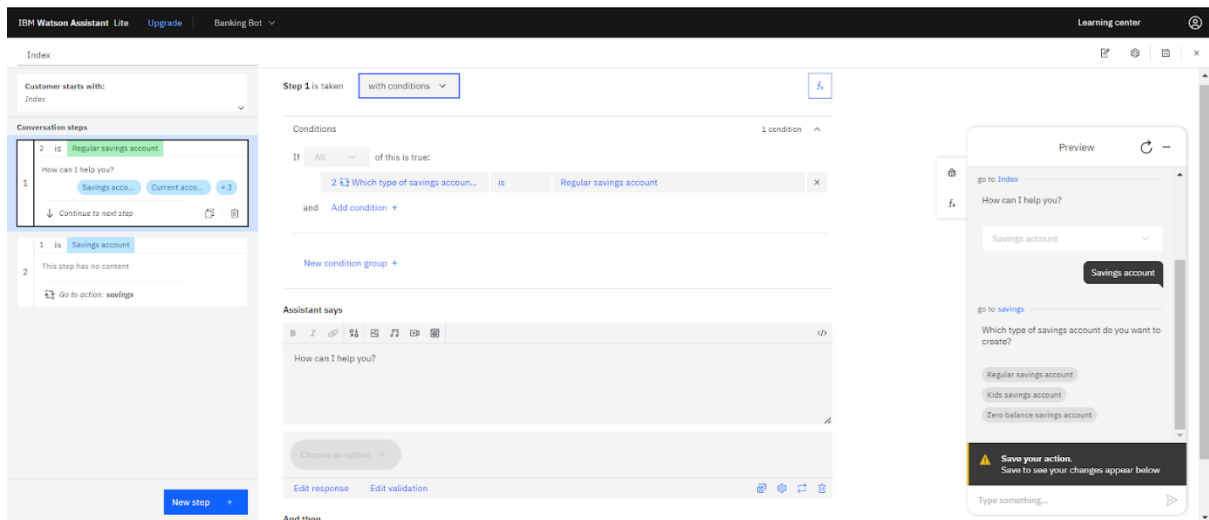

Here we have three categories of savings account as a customer response.

- 1.Regular savings account
- 2.Kids savings account
- 3.Zero balance savings account

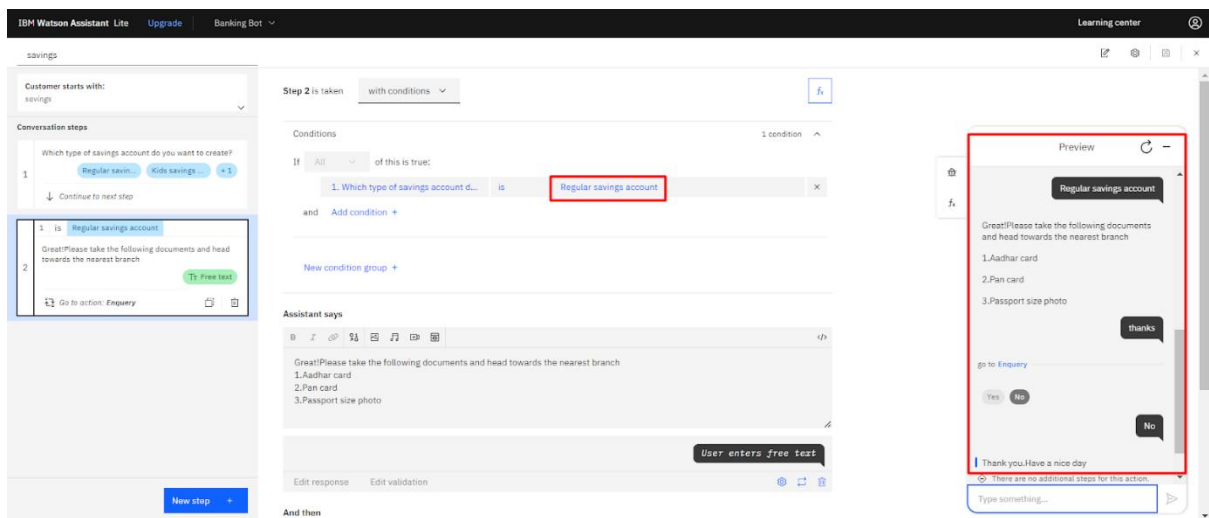

So when we select the savings account option we should be redirected to the above options

So we link the index actions with the savings actions..

Now if we click the regular saving account option details will be displayed and conversation is ended based on our response i.e yes/no

If No:

If yes:

IBM Watson Assistant Lite Upgrade Banking Bot Learning center

Enquiry

Customer starts with: Enquiry

Conversation steps

1 This step has no content

2 Thank you Have a nice day

3 1 is Yes

Go to action: Index

Conditions

If All of this is true:

1. No response is Yes

Assistant says

For example: What size do you want to order?

Define customer response

And then

Go to another action

Preview

1.Aadhar card

2.Pan card

3.Passport size photo

thanks

go to Enquiry

Yes No

go to Index

How can I help you?

Select an option

Type something...

The same goes for kids savings account and zero balance account

1.Aadhar card

2.PAN card

3.Passport size photo

go to Enquiry

Do you want to know about any other services?

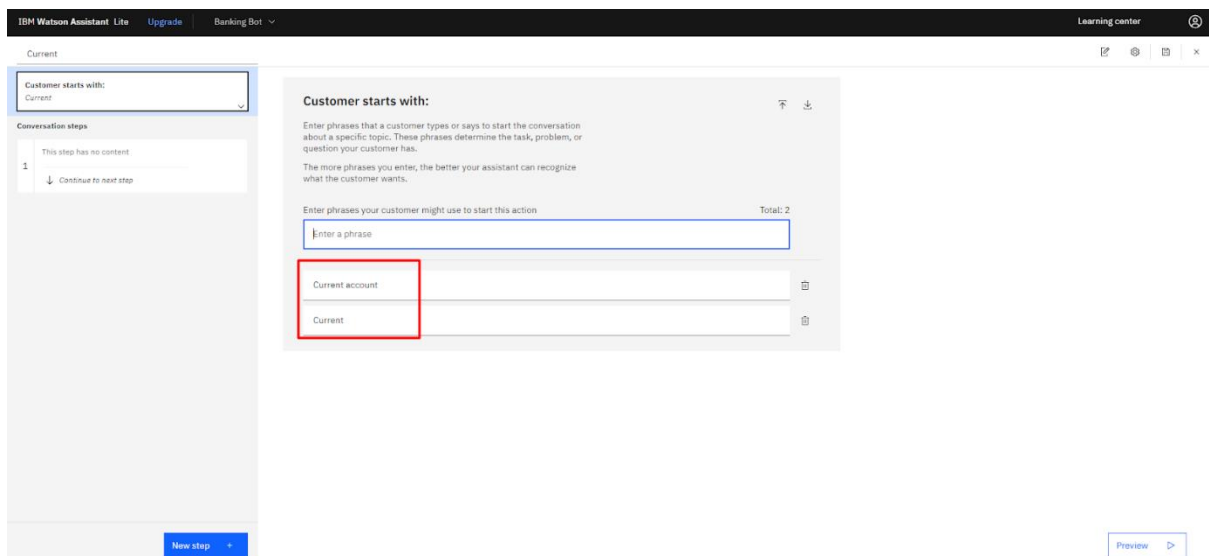

Use the up arrow for prior messages

2.Current account action:

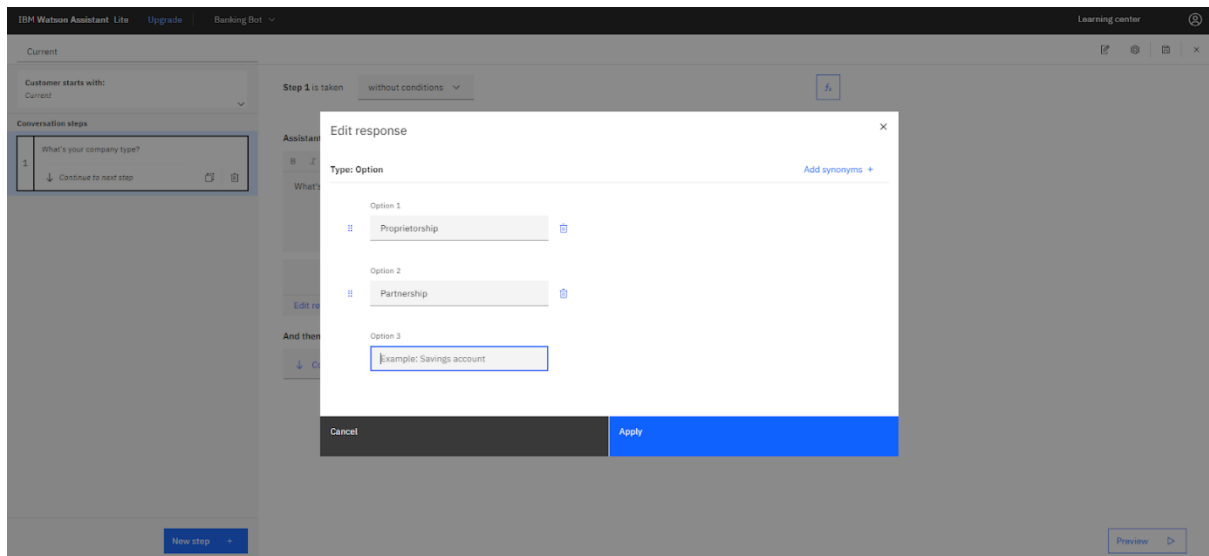

Now we create the action for current account queries.

If a customer types current or current account he will be redirected to this current action

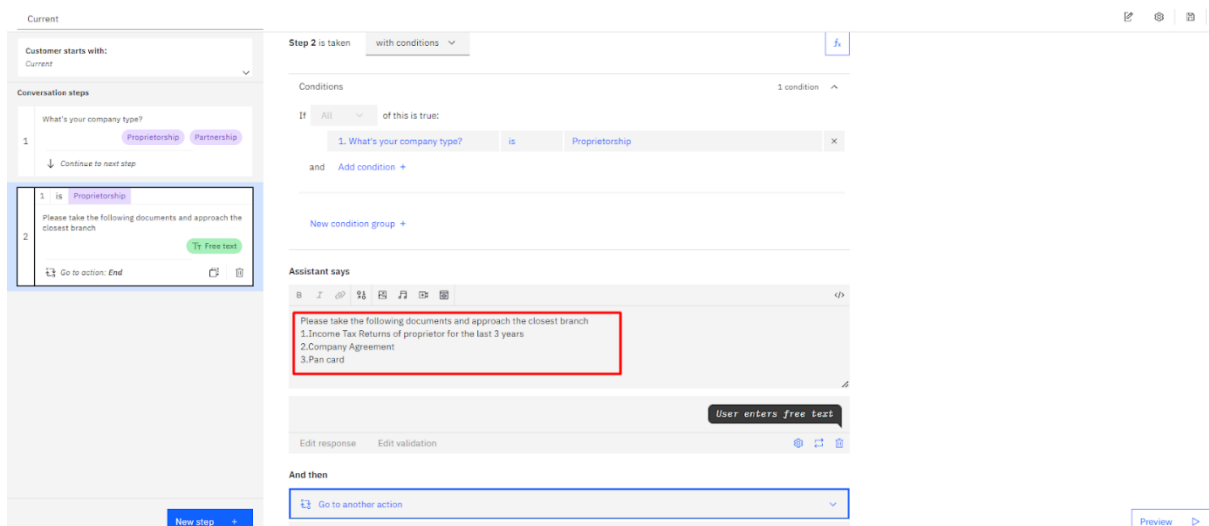

In customer response we add the company types as options

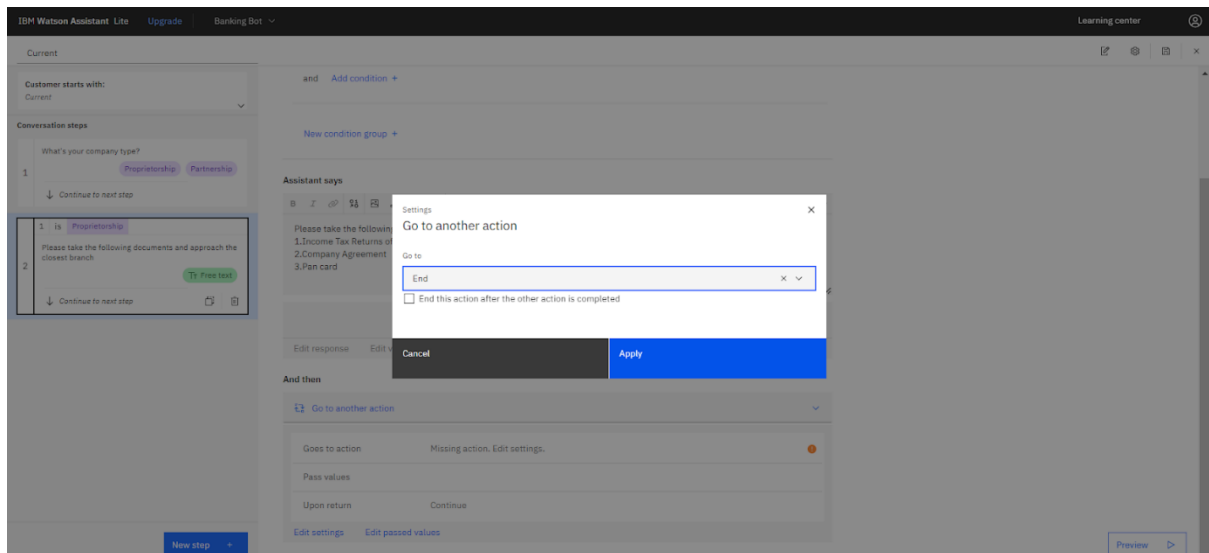

The user has two options to select the following images show the action done if user clicks on Proprietorship company.

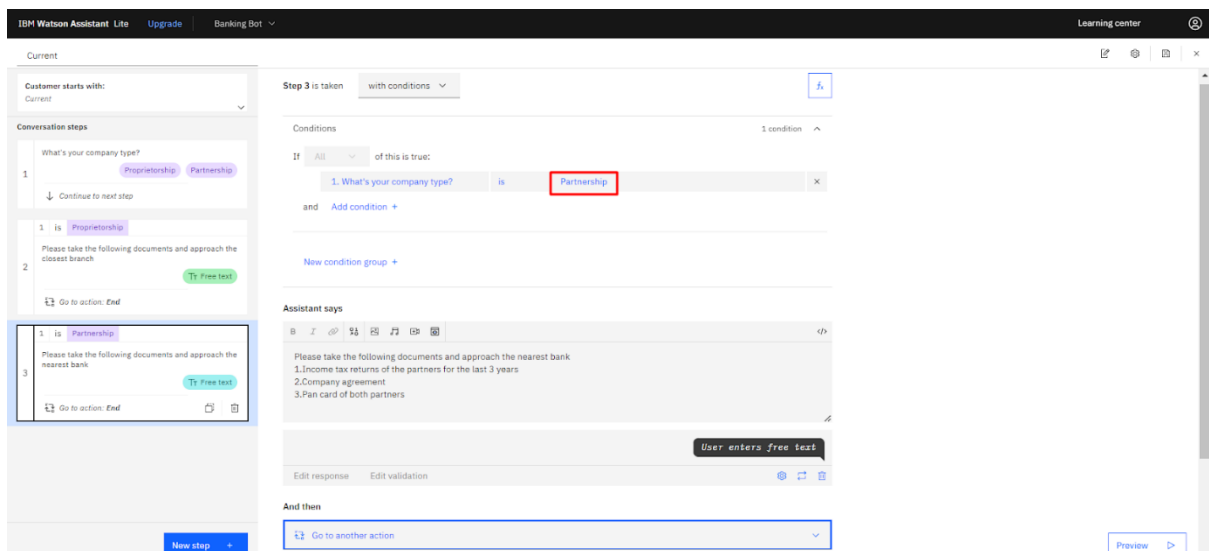

The chat bots' response as follows..

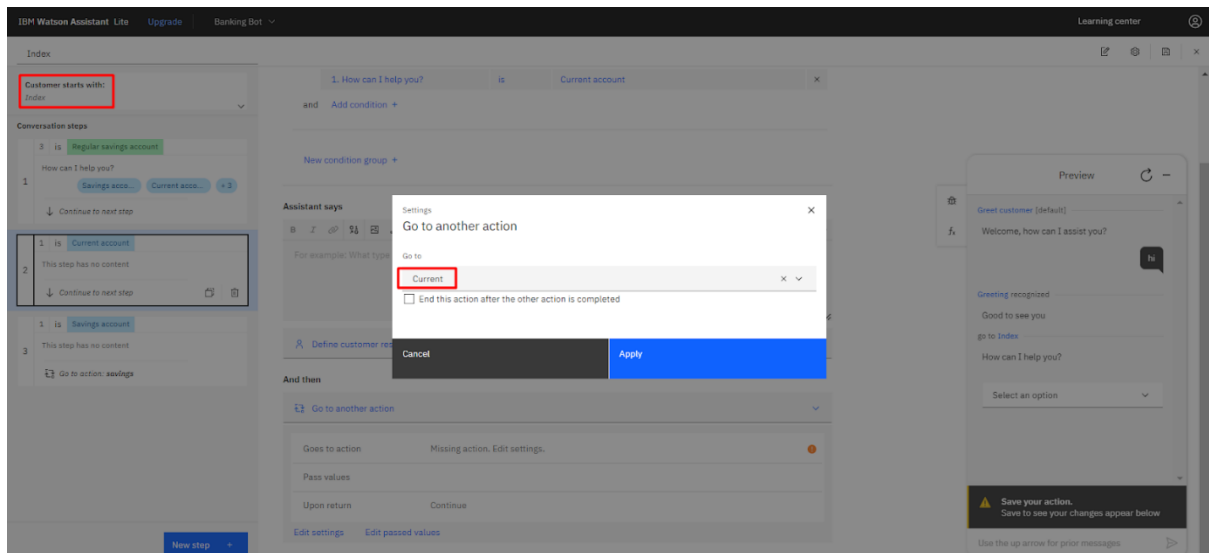

And according to users response we will redirect him to END action

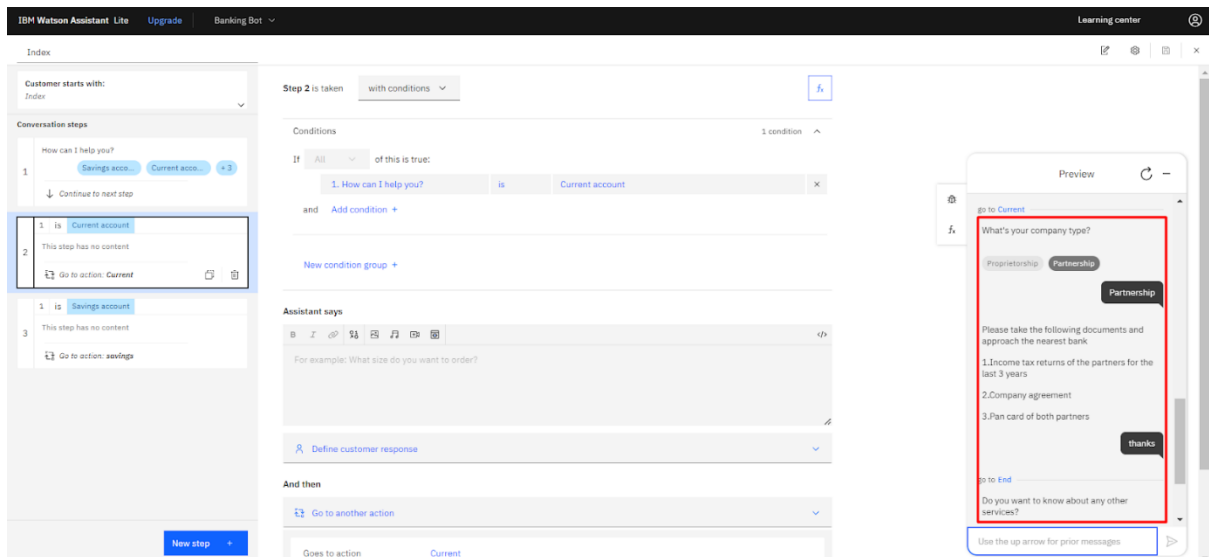

Now if the user clicks as partnership company we set the actions as follows similar to above action

Now we need to link this current account action to index action

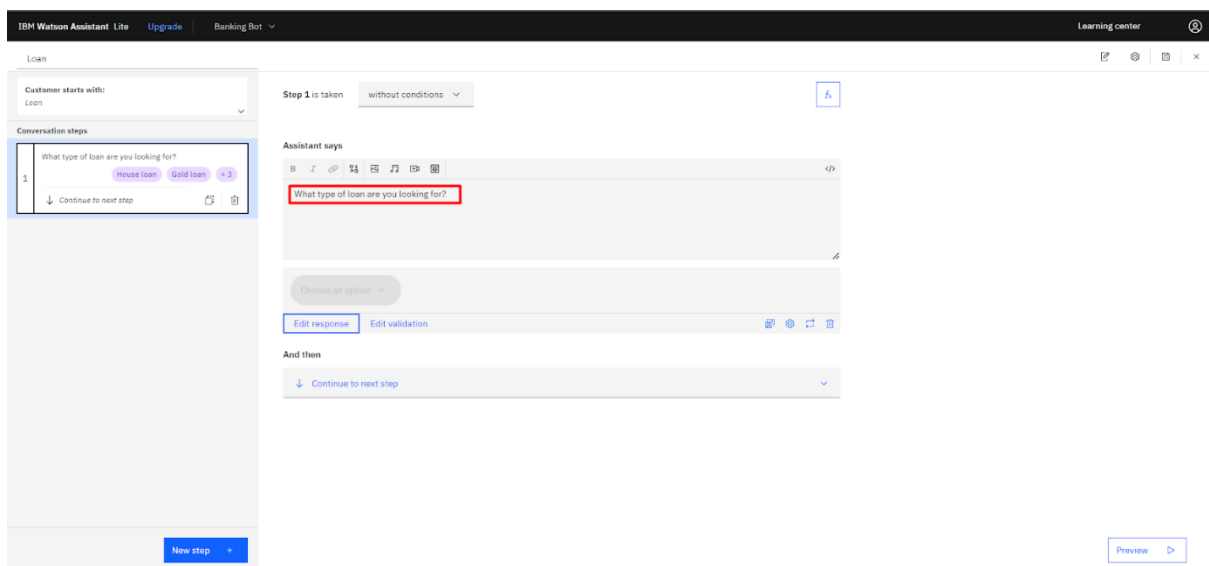

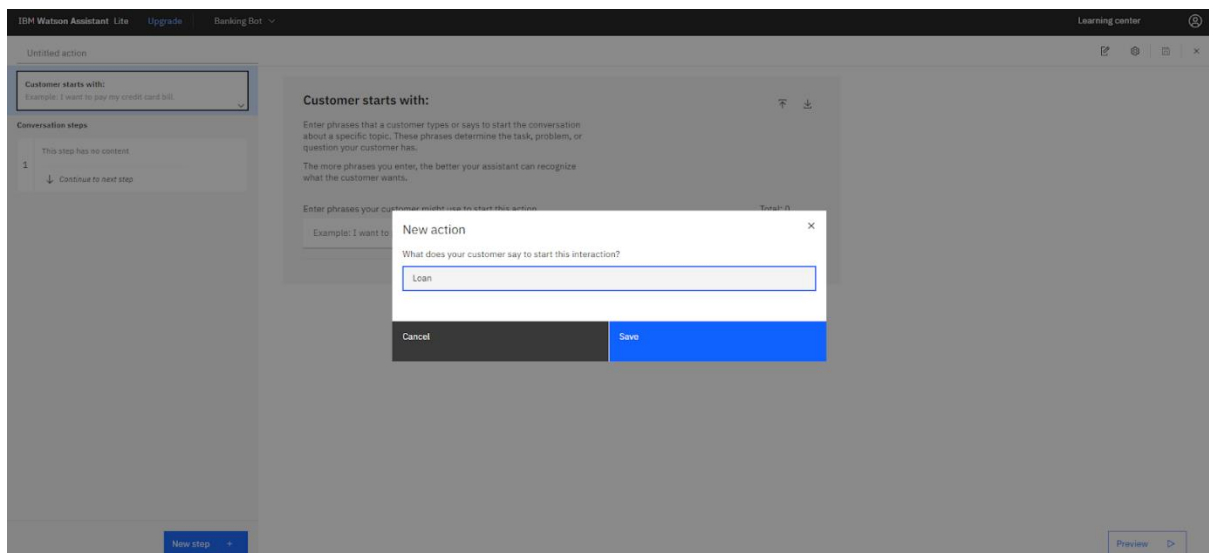

Now the preview shows

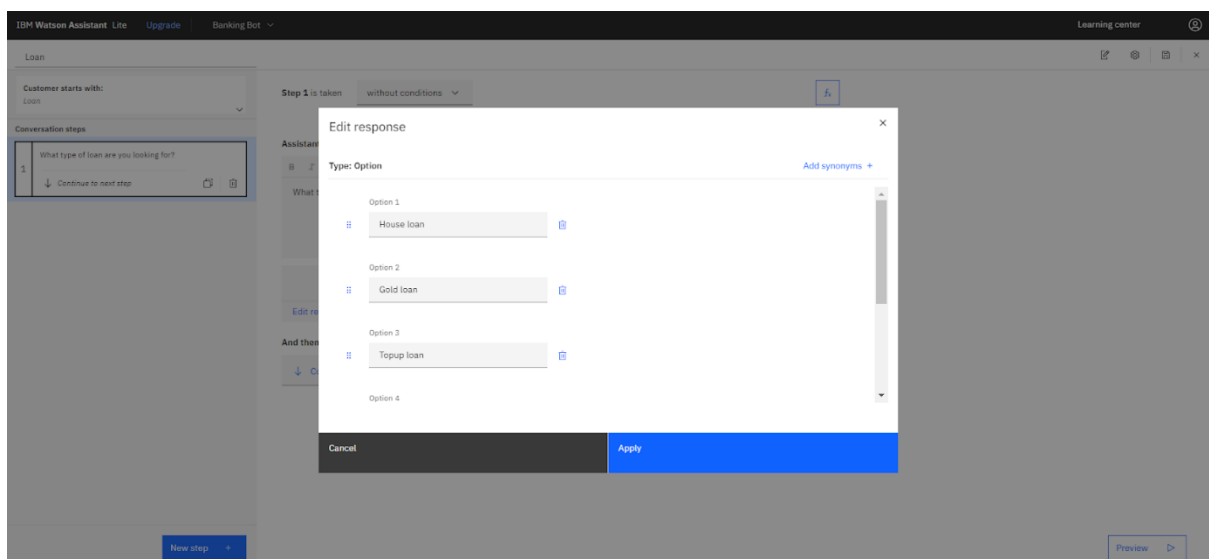

3.Loan action

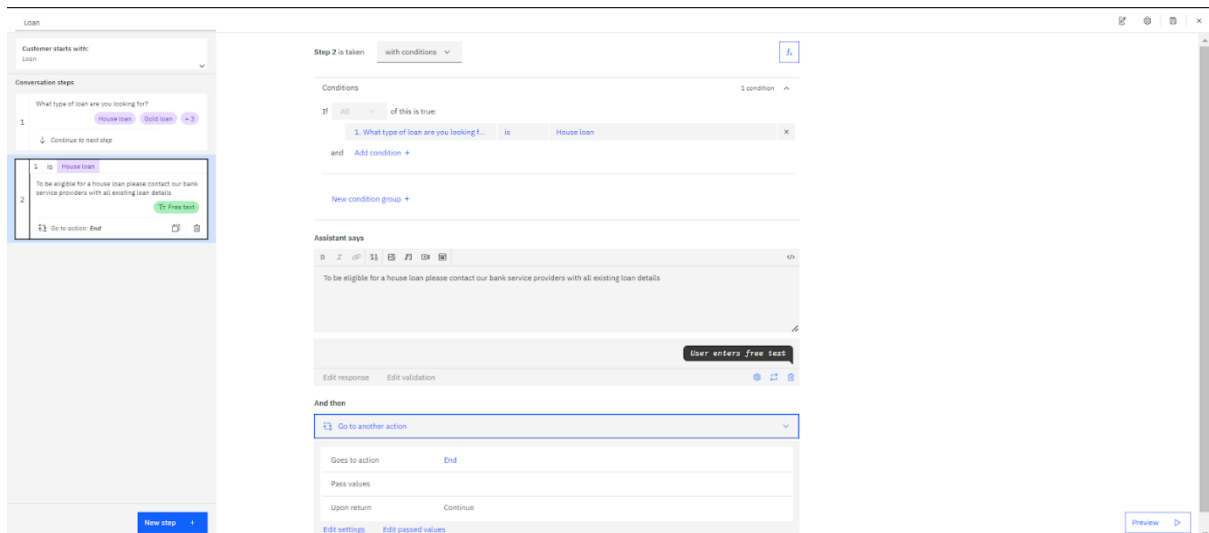

Here we create actions for loan queries

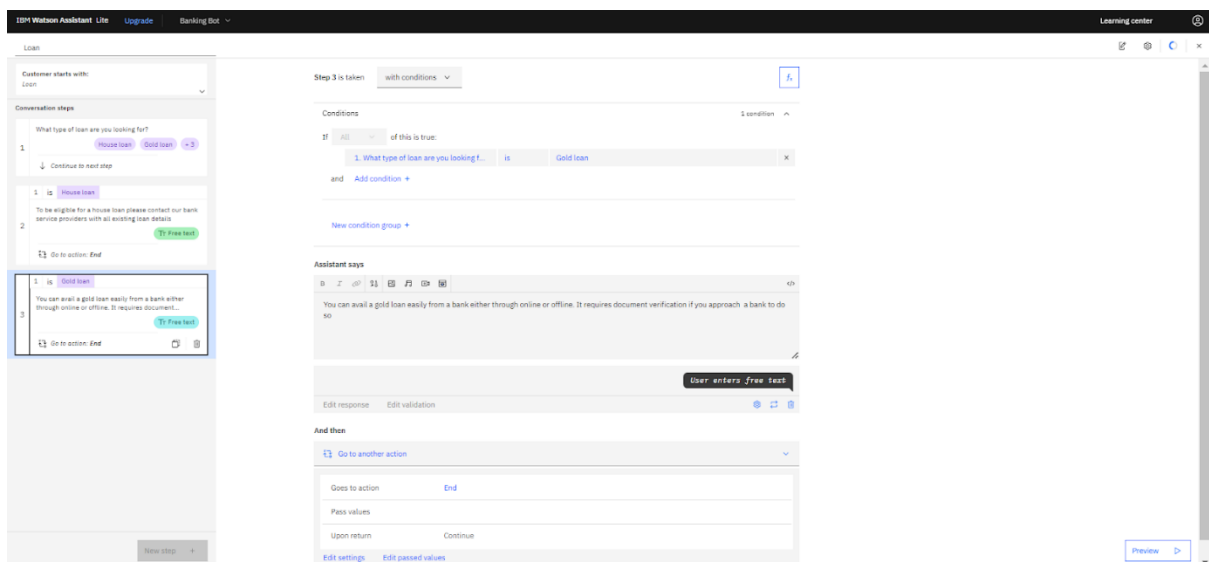

Customer response:

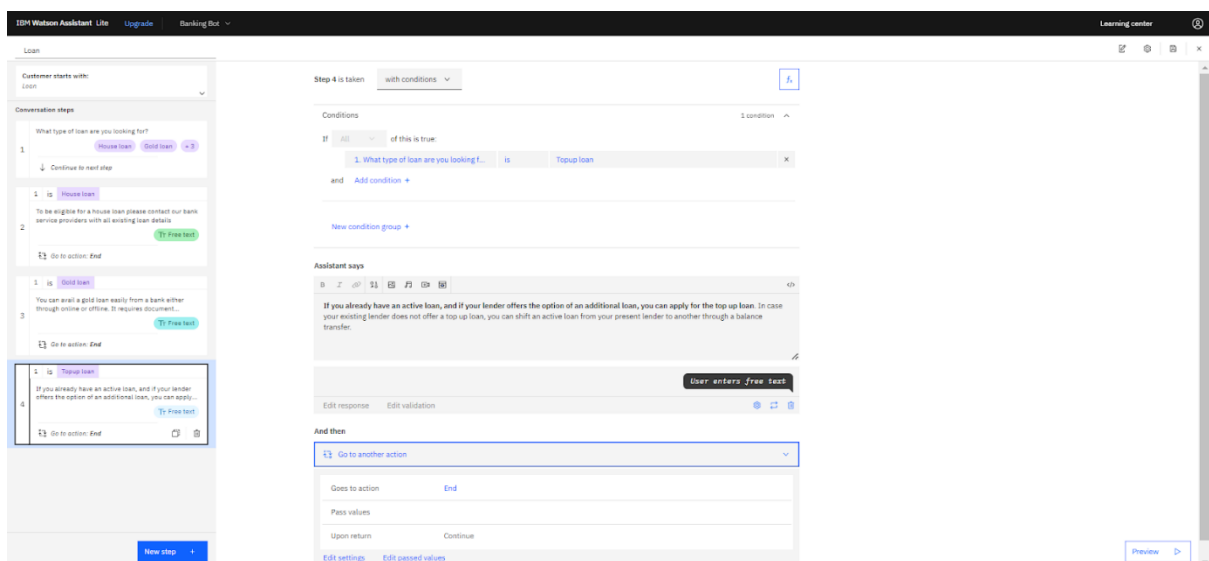

If the customer clicks on house loan:

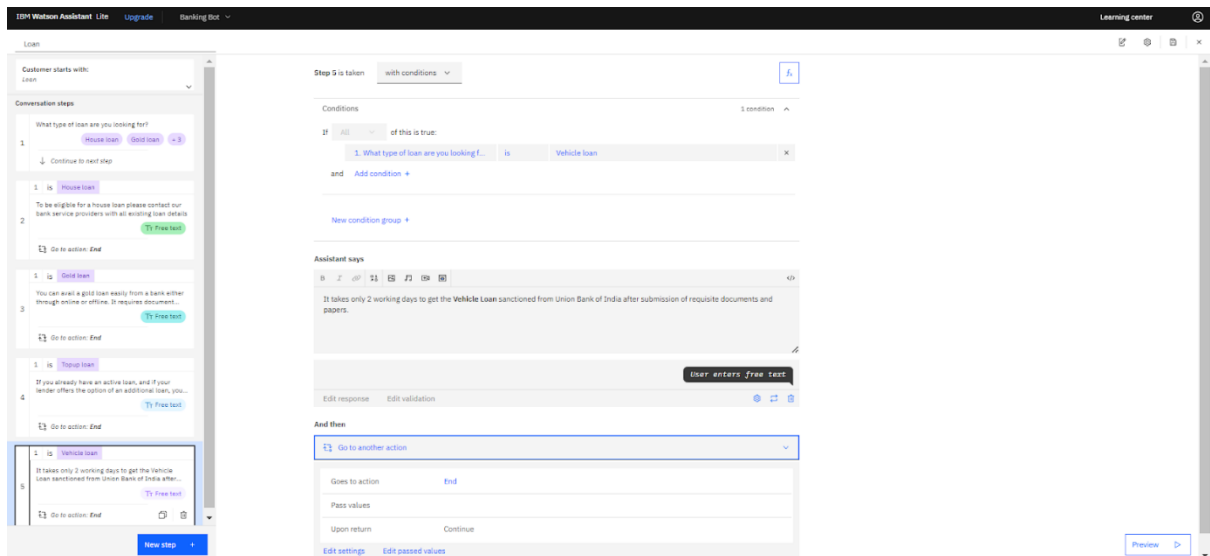

If the user clicks on gold loan:

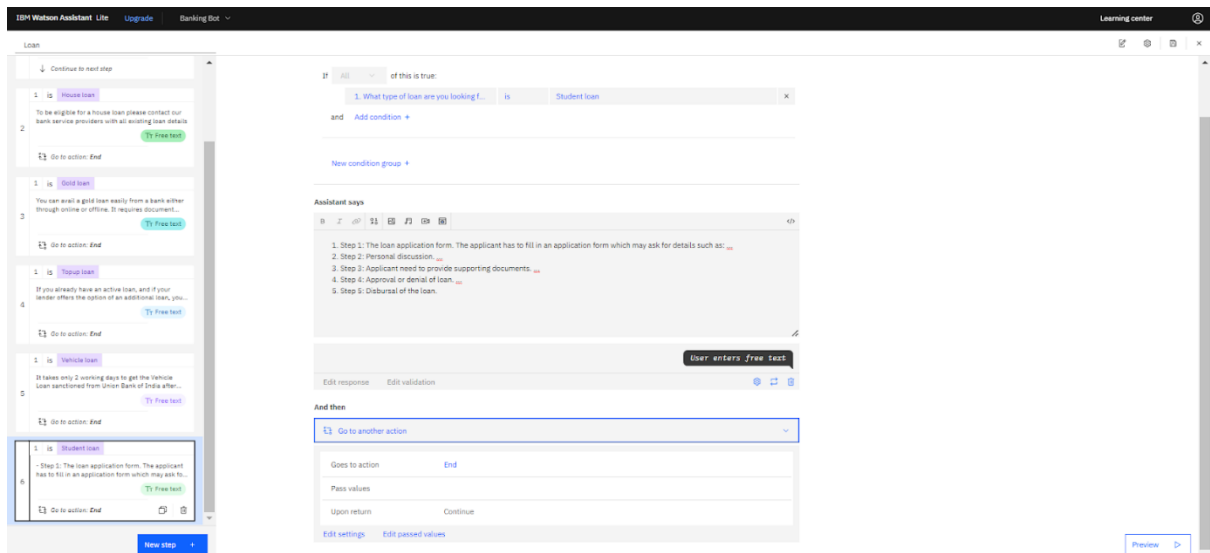

If the user clicks on topup loan:

If the user clicks on vehicle loan:

If the user clicks on Student loan:

Now we have to connect loan action with index action
